Professional Summary

Linux and DevOps-focused IT professional with hands-on experience in **Linux administration, server management, troubleshooting, automation, and infrastructure support**. Skilled in **RHEL, Ubuntu, Docker, Ansible, Bash, AWS, NGINX, Apache, and CI/CD**, with practical experience in **deployment, configuration management, networking, and system services**.

Technical Skills

Linux & Scripting: RHEL, Ubuntu, CentOS, Linux Administration, Bash/Shell Scripting, Python, CRON
DevOps & Automation: Docker, Kubernetes, OpenShift, Ansible, Containerization, Infrastructure Automation
Version Control: Git, GitHub, Branching Strategies, Repository Management
CI/CD: Jenkins, GitHub Actions, CI/CD Pipelines, Build and Deployment Automation
AWS Cloud: EC2, VPC, S3, ELB, IAM, Security Groups, Basic Networking
Infrastructure & Web Services: NGINX, Apache, SSH, Samba, NFS, MySQL, PostgreSQL
Monitoring & Support: System Monitoring, Troubleshooting, Incident Management, Root Cause Analysis, SLA Compliance
Tools: JIRA, Github.

Professional Experience

Aress Software

Nashik, India

Technical Support Engineer

Nov 2024 – Nov 2025

Linux Administration

- Provided hands-on **Linux system administration and technical support** across **RHEL, Ubuntu, and CentOS** environments, supporting **200+ end users** and resolving **20+ incidents daily** within defined **SLA** requirements.
- Performed **Linux administration** including **user and group management, file permissions, package management, process monitoring, service management, SSH access, and system health checks**.
- Configured, monitored, and troubleshoot **NGINX, Apache, Samba, NFS, MySQL, and PostgreSQL** services, supporting **Linux-based application and infrastructure availability**.
- Gained hands-on experience with **Docker containerization** and **Ansible automation**, supporting container-based application deployment and configuration management across Linux environments.
- Developed **Bash scripts and CRON jobs** to automate recurring **Linux administration and support tasks**, reducing manual intervention and improving operational efficiency.
- Supported **AWS infrastructure** including **EC2 and S3**, performing VM provisioning, configuration, connectivity checks, and infrastructure health monitoring, along with basic Azure environment support.
- Diagnosed and resolved **VPN, SSH, authentication, networking, and access-management issues** through troubleshooting, log analysis, root-cause identification, and appropriate escalation.
- Collaborated with **infrastructure and technical teams** to troubleshoot and resolve **system and production issues**, while maintaining SOPs, troubleshooting documentation, and security best practices.

Projects

Containerized Django REST API Deployment Pipeline | *Python, Django, React, Docker, Docker Compose, Nginx, Jenkins, Bash, Linux*

- **Containerized** a full-stack **Django REST API + React** notes application using **Docker and Docker Compose**, configuring isolated containers for application services and establishing reproducible deployment environments.
- **Designed the application delivery architecture** with **Nginx as a reverse proxy**, configuring request routing between frontend and backend services and handling static asset delivery.
- **Built an end-to-end Jenkins CI/CD pipeline** using **Bash automation** to pull source code, build Docker images, execute application tests, and deploy updated containers automatically.
- **Automated multi-container deployment workflows** with Docker Compose, including service startup, dependency management, container networking, and application configuration for consistent deployments.
- **Implemented practical Linux-based deployment and troubleshooting workflows**, working with container logs, processes, networking, environment configuration, and service failures during development and deployment.

Certifications & Training

Red Hat Certified System Administrator (RHCSA) – Training/Coursework
Red Hat Enterprise Linux (RHEL) – Administration Course

Education

MET Bhujbal Knowledge City
B.E. in Computer Engineering

Nashik, India
2018 - May 2024
